

Apollo - your start to a perfect finish...

High Volume Low Pressure—the very clever way to spray! At the heart of every Apollo HVLPSystem is a powerful and efficient turbine delivering High Volume air at Low Pressure. It's this massive air volume that atomises the paint not the pressure, so the paint stays on the surface and does not bounce back onto surrounding areas nor into the atmosphere. Easy to spray cleanly, efficiently and achieve a fantastic finish with minimal masking off. And because bounce back is reduced you will save paint and help protect the environment too.

Apollo is perfect where space is limited and for on-site spraying, classic cars, shop fitting, decorating, custom kitchen fitters and bath re-enamellers – anywhere needing clean, hassle free spray with a great finish!

APOLLO HVLPS

The all new Apollo HVLP Sprayers

All Apollo sprayers are supplied complete ready to go with turbine power unit, air hose and spray gun. Turbines are oil free and need no regular maintenance, just a filter change from time to time. Simplicity itself to use, no special skills are needed to achieve that perfect finish. With models available for hobby and professional users alike, there's an Apollo Sprayer to suit every budget.

Spraymate™

Ideal for Hobby and DIY users, an amazing performer at this price level. The lightweight gun has a 1 litre cup and 2 pattern air cap - horizontal and vertical. The flexible air hose makes the gun a dream to handle. The standard fit 1.8mm needle & spray jet size will handle most coatings. All the benefits of HVLP in a compact and inexpensive package.

Motor Watts	Voltz / Hz	Turbine Stages	Air Hose (metre)	Spray Set Up	hxwxh (cm)	KG
1100	220-240/50	2	3	1.8mm	30x36x19	4

Spraymaster™

Designed for the semi professional, the extra power of the turbine gives an enhanced finish, faster application and the tough all steel powder coated turbine power unit will handle everyday knocks. The high quality 5 metre air hose and aluminium hose connectors make this a rugged spray unit for on-site or in workshop use.

Motor Watts	Voltz / Hz	Turbine Stages	Air Hose (metre)	Spray Set Up	hxwxh (cm)	KG
1200	220-240/50	2	5	1.8mm	23x27x22	12

110 volt available on request (note! turbine design differs from illustration)

Pro-spray™ 1500³

Designed for the serious sprayer, this model has a powerful 1500 watt 3 stage turbine and the ability to handle all types of coatings. The all new ANB300 Proline™ aluminium gun is the ultimate in feel and performance and comes as standard with this model.

Motor Watts	Voltz / Hz	Turbine Stages	Air Hose (metre)	Spray Set Up	hwxwd (cm)	KG
1500	220-240/50	3	6	1.3mm	26x31x25	15

110 volt available on request

**Non
Bleed
Gun!**

Key ANB300 features -

“Non Bleed Gun” means air shuts off when the trigger is released - reduces dust lift.
Stainless Steel Needle & Jet Assembly - essential with water borne coatings.
Smooth, controllable trigger action.
Ergonomic, stay cool handle.
Adjustable fan pattern from horizontal to vertical & additional spot controller for super fine detail work.

Pro-spray Gun with optional 250ml cup

A useful range of optional extras is available to help you get the best from your ANB300 Spray Gun
